h1>Week-7 (September 20th - 2022)

Meeting Agenda

- ▶ Icebreaking (10m)
- ▶ Micro Learning & Presentations (55m)
- ▶ Project Discussion (10m)

Teamwork Schedule

Ice-breaking	10m	
--------------	-----	--

- Personal Questions
- Any challenges (Classes, Coding, studying, etc.)
- How you're studying, you need personal advice?
- Remember that practice makes perfect.
- What exactly each student does for the team, if they know each other, if they care for each other, if they follow and talk with each other etc.

Micro Learning & Presentations	55m	
--------------------------------	-----	--

(The problems and subjects in this part, has been prepared especially for you to equip yourself for the interview process and improve your coding skills. To get the most from this part, it's highly recommended to be prepared and present the topics in English. At first, it can be difficult to present in English and you can read from your notes, no problem. We strongly advise you to force yourself to present especially the interview questions in English. However, if you don't feel you can present in English, you can do any part in Turkish, that's no problem too. Please remember; we don't want to put extra pressure to anyone, it's totally up to you how you prepare for this section. The main and only aim of this part is to develop your skills that you need during and after the recruitment process and make you ready for the DS career.)

Questions & Problems Related to Course Topics

1. Answer questions in the below link according to SampleRetail Database

- [RDB&SQL Exercise-1](#)

Self-Study

You've learned a lot about Data Analysis so far. You have done assignments and projects. In order to keep this knowledge fresh and be applicable anytime, you will work on a 4 series project. All kinds of instructions about what to do and how to do are clearly in the documents. The first 2 series will be shared with you this week, and the last 2 series will be shared with you next week. Please take time for such activities and try to do it. (Optional)

- Please complete the House Price project with your teammate (You can find the House Price.csv file and data_description in GitHub).
- The purpose of this EDA is to find insights which will serve us later in another notebook for Data cleaning/preparation/transformation.
