h1>Week-12 (October 25)

Meeting Agenda

- ▶ Icebreaking (10m)
- ▶ Micro Learning & Presentations (30m)
- ▶ Project Discussion (40m)

Teamwork Schedule

Ice-breaking	10m	
--------------	-----	--

- Personal Questions (Stay at home & Corona, Study Environment, Kids etc.)
- Any challenges (Classes, Coding, studying, etc.)
- How you're studying, you need personal advice?
- Remember that practice makes perfect.
- What exactly each student does for the team, if they know each other, if they care for each other, if they follow and talk with each other etc.

Micro Learning & Presentations	30m	
--------------------------------	-----	--

(The problems and subjects in this part, has been prepared especially for you to equip yourself for the interview process and improve your coding skills. To get the most from this part, it's highly recommended to be prepared and present the topics in English / German. At first, it can be difficult to present in English / German and you can read from your notes, no problem. We strongly advise you to force yourself to present especially the interview questions in English / German. However, if you don't feel you can present in English / German, you can do any part in Turkish, that's no problem too. Please remember; we don't want to put extra pressure to anyone, it's totally up to you how you prepare for this section. The main and only aim of this part is to develop your skills that you need during and after the recruitment process and make you ready for the DS career.)

<

h3>Questions & Problems Related to Course Topics

Please discuss question with your teammate.

**1. What Are the Data Types Supported in Tableau?

**2. How Will You Understand Dimensions and Measures?

3. What is Meant by 'discrete' and 'continuous' in Tableau?

4. There Are Three Customer Segments in the Superstore Dataset. What Percent of the Total Profits Are Associated with the Corporate Segment?

5. What Are the Different Joins in Tableau?

6. What is the Difference Between Joining and Blending?

<

h3>Interview Questions

As the first half of the DS course is almost over as of this week, you are ready to apply any job post related to Data Analytics, Data Engineer, Business Analyst and like. Below there are some sample interview Questions and you can find more via Internet. It is important to discuss and find good answers to interview question in teamwork, because interview questions are also similar to each other.

1. What are the key responsibilities of a data analyst?

2. Enlist and explain the steps of a Data Analytics project lifecycle?
3. Name some of the best tools used for data analysis and data visualization?
4. What are the different methods of data collection?
5. How should a data analyst handle missing or null values?

Project Discussion	40m	
--------------------	-----	--

- [This data set contains information about Airbnb data of some European countries. You can practice preparing a dashboard with this dataset with your groupmates. \(Optional\)](#)
